INTRODUCTION

Highly motivated and detail-oriented Computer Science and Engineering student with a passion for crafting innovative mobile experiences. Currently honing my skills in iOS app development, with a strong foundation in programming languages such as Swift. Proficient in designing and developing user-friendly, scalable, and efficient applications. Eager to leverage my skills and knowledge to contribute to the development of cutting-edge mobile applications and drive business growth in the app development industry.

WORK EXPERIENCE

Software Developer Intern , Bluestock Fintech **April 2025 - Present**

- **What I did**: I developed production-level REST APIs for IPO services, built and integrated an IPO Web Application with secure authentication systems, and designed efficient database schemas. I created detailed API documentation, performed thorough testing and debugging, and worked closely with cross-functional teams to ensure a smooth and production-ready product delivery.
- **What I Learned:** I learned full-cycle product development from design to deployment, scalable and secure API development, clean and maintainable coding practices, basics of cloud deployment and CI/CD pipelines, best practices in API security and rate limiting, professional collaboration using Git, and strong real-world problem-solving and communication skills.
